BalcoNano® Heavy Duty Glass Cleaner information page for customers

Keep out of reach of children

Please read the Material Safety Data Sheet (MSDS) prior to use: [BalcoNano® Heavy Duty Glass Cleaner MSDS](#)

Why is it that some glass will just not clean up, no matter how hard you scrub? Over time dirt, grime and other deposits get lodged deep into the surface of the glass. Standard cleaners can often have trouble removing these really stubborn deposits which means no matter how hard you scrub you will never truly get your glass clean.

The first stage in restoring glasses is to use the BalcoNano® Heavy Duty Glass Cleaner.

The special formula of the BalcoNano® Heavy Duty Glass Cleaner reaches into the deep microscopic pits of the glass to release and loosen the imbedded particles. Giving the glass surface a deep clean

The BalcoNano® Heavy Duty Glass Cleaner is a very strong cleaner which includes Hydrofluoric acid – read the Safety Data sheet before use. Make sure to use gloves and eye protection.

Using the BalcoNano® Heavy Duty Glass Cleaner is easy to do:

- 1) Using gloves soak some liquid from the bottle into a clean cloth.
- 2) Apply the cleaner to the surface of the glass with the cloth, letting the cleaner form a sheet of liquid onto the surface of the glass.
- 3) The formula will now work to seep into the surface of the glass. Let the cleaner remain on the face of the glass for at least a minute.
- 4) Polish the surface with the cloth.
- 5) Depending on the state of the glass, this process may need to be repeated until all imbedded particles have been cleaned.

You can also view the video: <http://www.youtube.com/watch?v=4Y07DFcRTWc>

The purpose of this cleaner is to bring the glass surface back to its virgin state. The glass will now ready for the BalcoNano® coating that will ensure the surface remains protected from future deposits

Unprotected glasses tend to deteriorate from weather and the elements but now this process can be reversed on many of these.

Using the BalcoNano® Heavy Duty Glass Cleaner you can restore glass back to its natural state. Followed immediately by the [BalcoNano® coating](#) will make sure the glass stays this way.

IMPORTANT INFORMATION

- * Use gloves and eye protection
- * The Heavy Duty Glass Cleaner will remove the coating so do not apply to coated glass unless you want to remove the coating.
- * Do not apply to surfaces that may be negatively affected by acids
